NISKAA

Niskaa offers cybersecurity solutions and provide you, as an individual or as an organization, with a selection of available ISO training and certifications so that you can be confident that you or your organization is ready for whatever society asks of it.

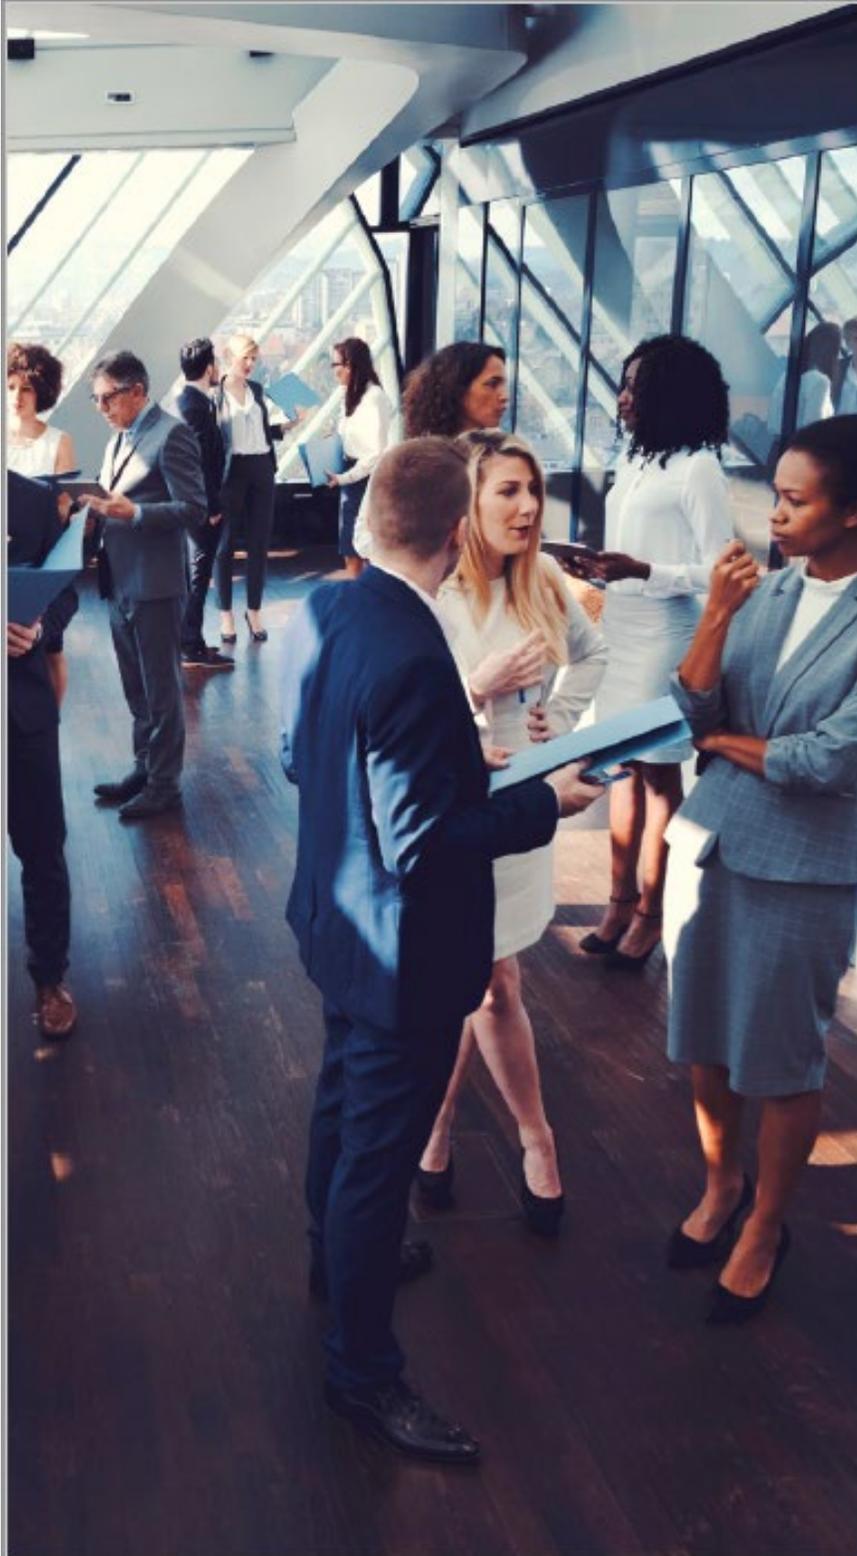

Niskaa believes that certification and compliance are one step towards protecting your future. We pride ourselves on offering the most value to you possible.

We offer tailored, highly focused and contextualized cybersecurity education for senior management and executives to understand their own specific cyber environment.

Niskaa provides planning, implementation and certification services for all of our solution. Niskaa will provide planning services to help you assess and understand your current state including strengths and areas to improve and will provide guidance on the way forward. After the planning, in collaboration with your organization, we provide the technical expertise and capabilities to enable and support the implementation of a solution and the education and training to do it right. We offer certification of your organization and your employees to prove to yourself and the world that you have the capabilities and are cognizant of your responsibilities for your industry.

Amongst providing core services in ISO standards training, implementation and certification, we offer Cybersecurity Maturity Assessment, Network Security Design, , Risk Management, Threat and Risk Assessment, Certification and Accreditation (C&A), Security Assessment and Authorization (SA&A), IT Security Penetration Testing and Vulnerability Assessment, Privacy Impact Assessment, Cloud Computing Security Assessment, IT Security Reviews / Studies, Disaster Recovery, Business Resumption Planning, Performance Analysis, Enterprise Re-Engineering, Maturity Model, Gap Analysis Studies and Technical Project Management.

Niskaa team has extensive expertise and knowledge of the NIST, Internet of Things (IoT) Security, Infrastructure Security, ISO standards including ISO/IEC 27001, 27002, 27005 and 31000, ISO 9001, Cobit5, ISA99 (ISA/IEC 62443 Standards), European General Data Protection Regulation (GDPR), ITIL, Agile methodology, Attack Tree-based Threat Risk Analysis and Cyber & ICT Security best practices.

THE STATURE OF PECB TRAINING COURSES

The increasingly competitive nature of the contemporary market demands to constantly create innovative solutions for the challenges society and the market face. Seeking continuous growth in your area of expertise is vital for professional development, which demonstrates your ability to develop and advance your career.

PECB Training Courses and Certifications provide both individuals and organizations with unmatched benefits, therefore making the cost and time of obtaining Certified Credentials a worthwhile process.

These core courses provided by Niskaa offer a competitive advantage comprising of round table training with qualified trainers that work in the field by sharing ideas and knowledge on how to implement or audit the ISO standard and encourage participants to share their views and insights.

We provide training in various languages and are available to conduct the training at your organization as an alternative to a rigid classroom environment.

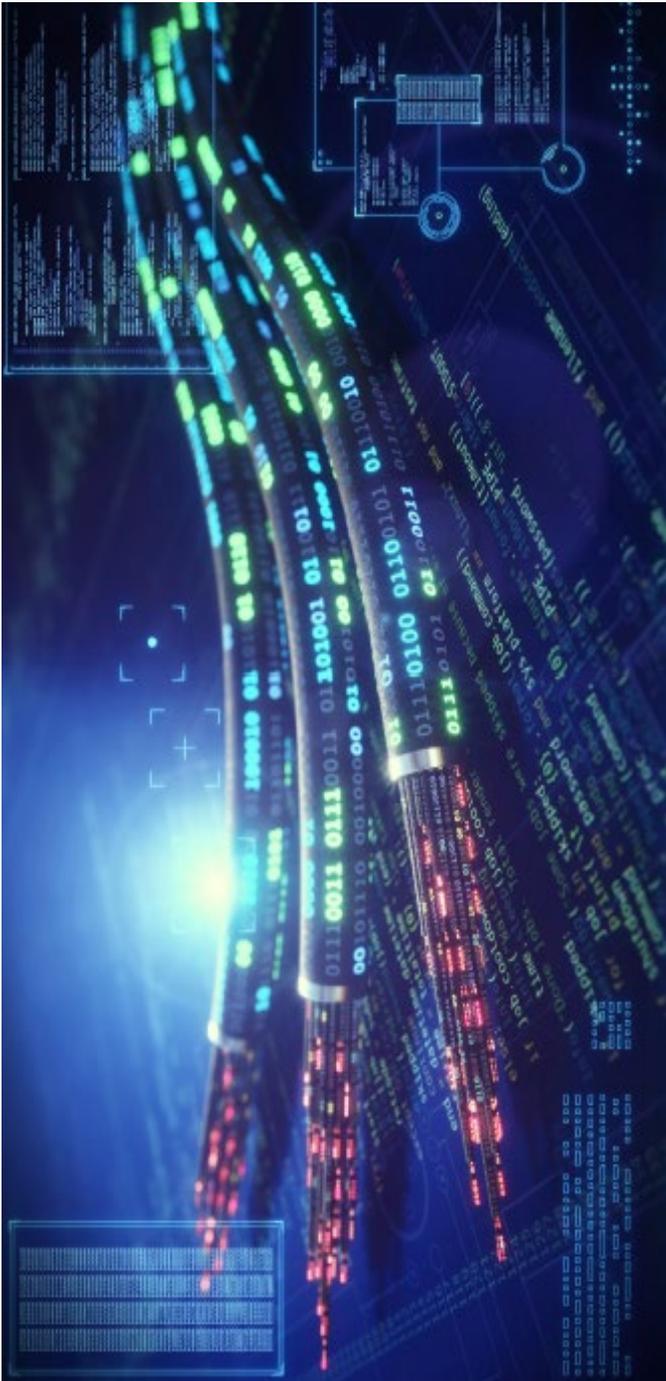

These are core courses provided by Niskaa.

We provide training in other ISO standards offered by PECB.

INFORMATION MANAGEMENT

Information Security Management (ISM) intends to manage the sensitive data of the organization, minimize risks and ensure business continuity by adopting security standards and frameworks. It provides a suitable balance between risks and guarantees to cover every procedure and policy regarding the transformation or dissemination of sensitive information.

Information Security is definitely the most important matter that concerns professionals around the world and with the right trainings you will gain the necessary knowledge and abilities to help an organization implement Information Security controls and best practices based on international standards. It will also help the organizations to secure and protect their information assets, minimize the probability of damage or loss, deal with the highest risks, successfully identify and assess risks through proven methods and effectively manage an Information Security Framework in the organization. As a result, you will be able to implement an Information Security Management System that will become part of the organization's culture.

INFORMATION SECURITY MANAGEMENT SYSTEMS BASED ON ISO/IEC 27001

THE ADVANTAGES OF BEING ISO/IEC 27001 CERTIFIED

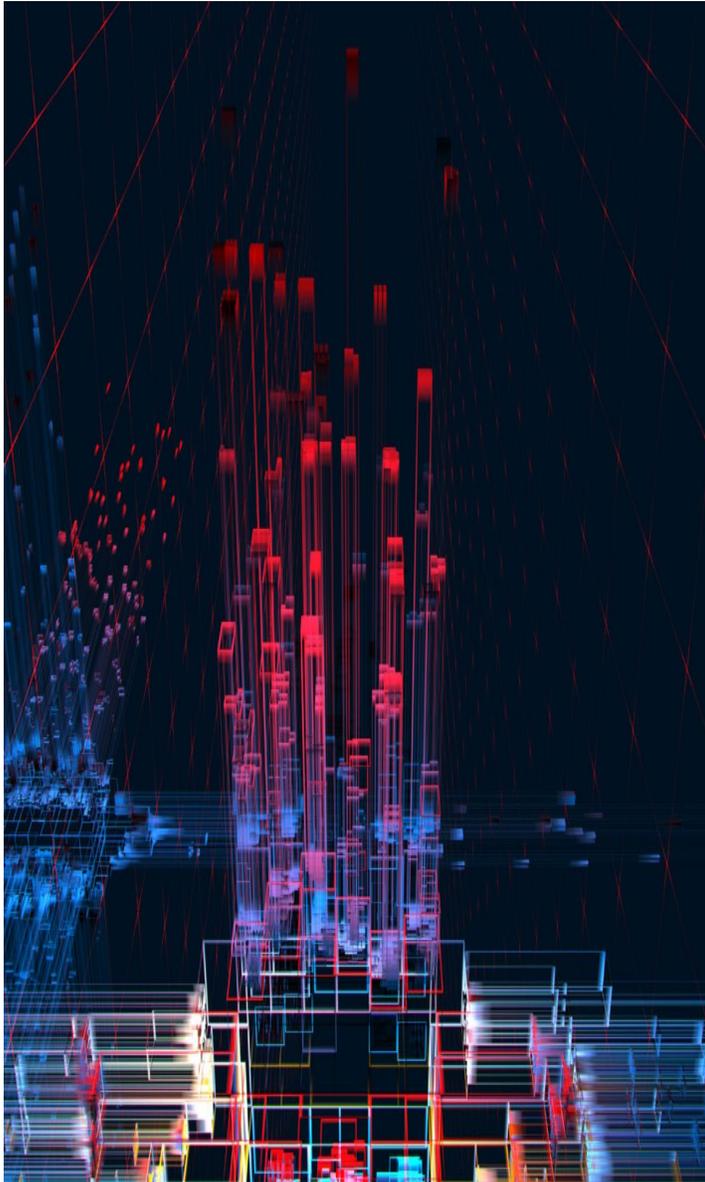

The ISO/IEC 27001 certification proves that you have the expertise to support an organization to successfully implement an Information Security Management System (ISMS) and avoid threats, vulnerabilities and possible negative impacts. This enables you to establish a systematic analysis of an organization’s information security risks and ensure the protection of the sensitive data. One of the major benefits for individuals who seek to pursue this certification is that the standard is recognized internationally as the best practice, allowing you to offer a continual improvement to your organization and ensure its compliance with regulations and requirements.

“According to a Global Report by ISO, besides improving information security posture by 69%, the ISO/IEC 27001 implementation also helps you gain a competitive advantage by 56%.”

THE BENEFITS YOUR ORGANIZATION GAINS

Information Security Management enables your organization to protect its data and privacy in the most efficient way. Considering the evolving Cyber-attacks and their sophistication, the volume of valuable information handled by organizations, and the complexity of supply chains, organizations need to have a sufficient security system, an ISMS, that protects their data. Also, this management system demonstrates a commitment to information security at all levels of the organization and shows to your potential and existing customers your organization’s credibility and trustworthiness.

COURSE	BENEFITS	
ISO/IEC 27001 Lead Implementer	Develop the expertise to support an organization in implementing and maintaining an Information Security Management System (ISMS) according to ISO/IEC 27001.	5 Days
ISO/IEC 27001 Lead Auditor	Develop the knowledge and expertise to perform an Information Security Management System (ISMS) audit based on audit best practices.	5 Days

INFORMATION SECURITY CONTROLS - BEST PRACTICES BASED ON ISO/IEC 27002

THE ADVANTAGES OF BEING ISO/IEC 27002 CERTIFIED

This certification proves that you have acquired the necessary expertise to implement Information Security controls and enables you to apply the best practices of Information Security Management in an organization. It also helps you to create a comprehensive framework and improve Information Security Management within an organization by using potential controls that can identify risks and effectively manage them.

THE BENEFITS YOUR ORGANIZATION GAINS

Instead of focusing purely on technological solutions, the management of Information Security according to ISO/IEC 27002 provides a broader view of the security problems related to both your business information and any individual in your organization – which are the most valuable assets. ISO/IEC 27002 assists organizations in developing, maintaining and optimizing the Information Security Management system based on an effective control structure. Establishing an Information Security Management System (ISMS) based on the guidelines of ISO/IEC 27002, guarantees the continuity and maintenance of security processes, aligned with the strategic objectives of the organization.

COURSE	BENEFITS	
ISO/IEC 27002 Manager	Develop the expertise on how to implement, operate, communicate and manage the Information Security controls in compliance with ISO/IEC 27002.	3 Days
ISO/IEC 27002 Lead Auditor	Master the concepts, skills, knowledge and techniques to implement and effectively manage Information Security controls based on ISO/IEC 27002.	5 Days

**INFORMATION SECURITY RISK MANAGEMENT
BASED ON ISO/IEC 27005**

**THE ADVANTAGES OF BEING ISO/IEC 27005
CERTIFIED**

This certification will prove that you have the necessary knowledge, skills, and capabilities to support an effective Information Security Risk Management process in an organization. In addition, you will also obtain a comprehensive understanding of Risk Assessment Methods such as OCTAVE, EBIOS, MEHARI and harmonized TRA. Therefore, this certification will prove that you are able to identify, assess, analyze, evaluate and treat various information security risks faced by organizations.

THE BENEFITS YOUR ORGANIZATION GAINS

Information Security Risk Management enables your organization to integrate and manage Information Security based on a risk management approach, by providing the best practical guidance on risk assessment, with a focus on threats, vulnerabilities, likelihoods, and impacts. In addition, the ISO/IEC 27005 will help an organization to conduct an effective risk analysis in order to decide whether risks need to be treated and choose the most appropriate risk treatment strategies and methods.

COURSE	BENEFITS	⌚
ISO/IEC 27005 Risk Manager	Develop the competence for the risk management process related to Information Security assets in accordance with ISO/IEC 27005.	3 Days
ISO/IEC 27005 Lead Risk Manager	Acquire the necessary expertise to support an organization in the Information Security Risk Management process using the ISO/IEC 27005 standard as a reference framework.	5 Days

CONTINUITY, RESILIENCE AND RECOVERY

CRR Management refers to all activities that play a critical role in delivering capacity for recovery and availability and are based on strategic approaches for designing, managing and improving the processes and procedures for business continuity involved in an organization. CRR Management helps to ensure that an organization has in place the necessary people and processes to ensure availability of business activities which are crucial to achieve organizational goals.

With the proper training, you will acquire the necessary skills and knowledge to help organizations of any type and industry remain resilient and attain quality services. The implementation of CRR best practices based on international standards in the organization's management systems will ensure business continuity, improve corporate image, maintain and manage an ongoing disaster recovery plan, protect supply chain security, enhance the efficiency of emergency management, effectively establish a business impact analysis process, etc.

DISASTER RECOVERY

THE ADVANTAGES OF HAVING A DISASTER RECOVERY CERTIFICATION

This certification validates that you have the expertise to support an organization in implementing, maintaining, and managing an ongoing Disaster Recovery Plan as part of a reliable backup and recovery plan. As a result, you will enhance your level of preparedness in order to keep the business running, in case of human or naturally triggered disruptions in the IT infrastructure.

Further, it requires you to run through what would happen in various scenarios, and design a Disaster Recovery Plan, providing a sense of security for the organization by minimizing the risk of delays and assuring the reliability of standby systems. Being certified against Disaster Recovery demonstrates your determination to achieve a certain level of professional competence in the industry.

“According to US Cloud website, 80% of companies without a DRP are most likely to go out of business within one month after a significant data loss.”

THE BENEFITS YOUR ORGANIZATION GAINS

Disaster Recovery ensures that your organization has an effective system in place for the backup and recovery of key activities in order for the organization to quickly get back on track and preserve its reputation with customers and partners in case of a disaster. It increases the likelihood of business survival and it makes sure that your organization is operating in compliance with industry regulations.

COURSE	BENEFITS	
Disaster Recovery Manager	Acquire the necessary knowledge and skills to establish a Disaster Recovery Plan.	3 Days
Disaster Recovery Lead Risk Manager	Master the skills and enable yourself to implement, maintain and manage an ongoing Disaster Recovery Plan.	5 Days

GOVERNANCE, RISK AND COMPLIANCE

Governance, Risk and Compliance is the process of identifying, analyzing, evaluating and monitoring risk controls, followed by a coordinated and economical application of financial resources to mitigate the uncertainty in investment decisions.

Therefore, with the proper training you will acquire the necessary knowledge and skills to assist an organization in implementing governance, risk and compliance based on best practices. These field-proven frameworks will help you identify and manage risks before they affect the business, manage corporate governance of the IT system, generate value from assets, achieve project success efficiently and within budget, and effectively manage bribery to create a better ethical culture.

RISK MANAGEMENT BASED ON ISO 31000

THE ADVANTAGES OF BEING ISO 31000 CERTIFIED

ISO 31000 certification will prove your capabilities of improving operational efficiency, govern and manage organizational risks. It will enable you to structure a Risk Management Framework based on international best practices which facilitates the identification, analysis, treatment, assessment and evaluation of risks that are or can be faced by the organization.

Moreover, this certification will help you to analyze and assess different factors that will improve management techniques across the organization where you operate and improve your personal performance and resilience.

THE BENEFITS YOUR ORGANIZATION GAINS

Risk Management ensures that your organization has in place an effective Risk Management Program based on best practices, which will enable your organization to manage risks effectively in order to perform well in an environment full of uncertainties.

Risk Management is a key driver for success and an important part of strategic and operational planning, management decisions, and governance.

COURSE	BENEFITS	
ISO 31000 Risk Manager	Develop the competence to implement Risk Management Processes in an organization by following ISO 31000 guidelines.	3 Days
ISO 31000 Lead Risk Manager	Master the implementation of a Risk Management Process based on ISO 31000, and by using risk assessment methodologies provided by ISO 31010.	5 Days

ANTI-BRIBERY MANAGEMENT SYSTEMS BASED ON ISO 37001

THE ADVANTAGES OF BEING ISO 37001 CERTIFIED

This certification validates your knowledge and competencies toward implementing and managing an Anti-Bribery Management System with internationally recognized anti-bribery best practices.

You will be able to implement the necessary measures to prevent, detect and address bribery before it impacts your organization. ISO 37001 Certification is a powerful factor to differentiate you in a competitive work environment.

“According to the International Monetary Fund (IMF), the annual cost of bribery is estimated to be \$1.5 to \$2 trillion.”

THE BENEFITS YOUR ORGANIZATION GAINS

Anti-bribery Management gives your organization the opportunity to promote confidence, credibility and reliability to stakeholders and customers. It will also provide your organization with the necessary measures to prevent, detect and address bribery while avoiding reputation damage and costs.

COURSE	BENEFITS	
ISO 37001 Lead Implementer	Master the implementation and management of Anti- bribery Management Systems (ABMS) based on ISO 37001.	3 Days
ISO 37001 Lead Auditor	Develop the expertise to audit an ABMS to ensure that an organization is competent in maintaining its management system based on ISO 37001.	5 Days

GENERAL DATA PROTECTION REGULATION (GDPR)

THE ADVANTAGES OF HAVING A GENERAL DATA PROTECTION REGULATION CERTIFICATION

Becoming a Certified Data Protection Officer will enable you to acquire the necessary expertise to implement a data protection framework that helps the organization comply with GDPR requirements, protect fundamental rights of the data subjects, and ensure harmonized processing and control of personal data.

“According to the European Commission, €2.3 billion are the yearly estimated economic benefits of having one regulation on data protection.”

THE BENEFITS YOUR ORGANIZATION GAINS

Appointing a CDPO enables your organization to implement the necessary measures to prevent personal data breaches and to ensure a higher level of data security while processing personal data, exchanging information and transferring personal data.

It will also help you minimize security incidents, increase efficiency and effectiveness, and build customer trust.

COURSE	BENEFITS	
GDPR Foundation	Become familiar with GDPR requirements and data protection principles provided by the GDPR.	1 Day
GDPR - Certified Data Protection Officer	Obtain all the competencies and knowledge necessary to lead all the processes for implementing and complying with the GDPR requirements in an organization.	2 Days

QUALITY MANAGEMENT

The Quality Management System is the foundation of all standards and it is the starting point for organizations to attain better process control, efficiency, and customer satisfaction. Quality Management Systems can be integrated with other management systems that cover different aspects, industries, levels, and functions of an organization, jointly, improving the efficiency and quality of the end product or service.

With that being said, having the necessary knowledge and expertise to implement Quality Management Systems based on international standards enhances and sustains quality in varying areas such as business, customer services, medical devices manufacturing, production, records management, project management and testing and calibration laboratories.

QUALITY MANAGEMENT SYSTEMS BASED ON ISO 9001

THE ADVANTAGES OF BEING ISO 9001 CERTIFIED

This certificate will demonstrate that you possess the necessary expertise to effectively support an organization in implementing and maintaining the best quality processes. You will be able to set out areas of responsibilities throughout the process, which will address the risks and opportunities leading to overall performance improvement.

Furthermore, you will be able to deliver consistent services through the effective use of resources and reach your objectives faster. This will enhance your personal performance, while at the same time improving the quality of your products and/or services.

THE BENEFITS YOUR ORGANIZATION GAINS

A Quality Management System provides your organization with a set of processes and systems which will positively engage employees, build a continual improvement culture, and lead to customer satisfaction. Moreover, this standard will improve your organization’s credibility and image by showing that you have met the necessary requirements. This, in turn, will direct customers to choose your organization among the rest.

“According to a study conducted by the Harvard Business School, companies that adopt ISO 9001 are much more likely to stay in business and, experience faster sales growth than those that choose not to pursue certification to the Quality Management System standard.”

COURSE	BENEFITS	
ISO 9001 Lead Implementer	Develop the necessary expertise to support an organization in establishing, implementing, managing and maintaining a Quality Management System (QMS)	5 Days
ISO 9001 Lead Auditor	Develop the necessary expertise to perform a Quality Management System (QMS) audit by applying widely recognized audit principles, procedures and techniques.	5 Days

AEROSPACE QUALITY MANAGEMENT BASED ON AS9100

THE ADVANTAGES OF BEING AS9100 CERTIFIED

Being AS9100 certified demonstrates that you can apply the best practices of aerospace industry, which enables you to produce high quality products and services. Also, considering that the aerospace industry is particularly famous for demanding customers and strict regulations, the certification against this standard will allow you to anticipate the customers' future needs, while at all times maintaining integrity and compliance to regulatory requirements.

THE BENEFITS YOUR ORGANIZATION GAINS

Aerospace Quality Management will demonstrate that your organization has the ability to utilize better the abilities of its people, and meet the customer and regulatory requirements, which results in increased confidence, satisfaction and opportunity to achieve competitive advantage. Moreover, considering the ever- increasing complexity of supply chains, the organization will be able to demonstrate commitment to quality, on-time delivery, and ensure reliability while guaranteeing continuous improvement.

COURSE	BENEFITS	
AS9100 Lead Implementer	Develop the necessary expertise to support an organization in establishing, implementing, managing and maintaining an Aerospace Quality Management.	5 Days
AS9100 Lead Auditor	Develop the necessary expertise to perform an Aerospace Quality Management audit by applying widely recognized audit principles, procedures and techniques.	5 Days

PROJECT MANAGEMENT BASED ON ISO 21500

THE ADVANTAGES OF BEING ISO 21500 CERTIFIED

The ISO 21500 certification will demonstrate that you have understood the essential concepts and processes required to successfully manage and deliver projects. Furthermore, it is a sound confirmation of your managerial capabilities.

You will gain insights on how to test whether the different assumptions and chosen approaches of diverse projects are in-line with the organization’s policies, systems and objectives. This certification proves your ability to work on international projects and your flexibility as an employee.

“According to a survey conducted by the Economist Intelligence Unit, 90% of global senior executives ranked project management methods as either critical or somewhat important to their ability to deliver successful projects and remain competitive.”

THE BENEFITS YOUR ORGANIZATION GAINS

The concepts and processes of Project Management will increase your organization’s operational performance and reduce its costs. The latter can be achieved by avoiding the costs involved and allocating the resources or funds to other relevant parts of the projects.

Furthermore, it helps your organization understand the essential principles of project management and improve its internal communications. The improved internal communications will enable the simplification of the terminology and the transfer of knowledge between projects.

COURSE	BENEFITS	
ISO 21500 Lead Project Manager	Acquire the expertise to lead an organization and its team to implement, manage and maintain projects based on ISO 21500.	5 Days
ISO 21500 Lead Assessor	Effectively evaluate a project’s performance and determine whether it is being managed based on ISO 21500 guidelines and best practices.	5 Days

SUPPLY CHAIN SECURITY MANAGEMENT BASED ON ISO 28000

THE ADVANTAGES OF BEING ISO 28000 CERTIFIED

This certification demonstrates that you are an asset to your organization and that you are a trustworthy expert. It enables you to help the organization in establishing a Supply Chain Security Management System (SCSMS) that ensures the sufficient management and control of security and threats, coming from logistical operations and supply chain partners. It will also improve your efficiency in daily tasks and benchmark your performance on supply chain security based on the best international practices. Ultimately, the ISO 28000 certification ensures that you have gained the decision-making skills, particularly in relation to the distribution of resources, which should be done based on a process of effective risk assessment.

“Referring to the JBW Group International studies, the implementation of ISO 28000 helps your organization decrease supply chain disruption by 28.9% and increase sales by 24.1%.”

THE BENEFITS YOUR ORGANIZATION GAINS

Supply Chain Security Management will have a direct impact on the level and security of your organization’s supply chain. It takes into account not only the organization’s security, but also the security of the goods it protects. Your organization will be able to determine if appropriate security measures are in place and protect their properties from various threats.

COURSE	BENEFITS	
ISO 28000 Lead Implementer	Acquire the expertise and capacity to analyze and make decisions in the context of the ISO 28000 implementation.	5 Days
ISO 28000 Lead Auditor	Be able to understand the purpose of a SCSMS and to conduct an audit in order to secure the compliance of MS with ISO 28000 requirements.	5 Days

IT GOVERNANCE & SERVICE MANAGEMENT

Since the early 90's, companies' attention towards IT Governance has been increasing exponentially. As part of Corporate Governance, more resources than ever are being allocated to this discipline, with the intention of optimizing IT infrastructure and help businesses reach final goals. The IT Governance & Service Management Portfolio includes courses and services designed to help you effectively apply IT resources towards the accomplishment of business aims and objectives. Furthermore, businesses will be able to reduce risks and learn how to implement necessary strategies to always be resilient.

Service Management refers to the extensive systems for organization's management which entail planning, strategies, policies, objectives, documentation and processes. Service Management systems allow you to achieve continuous improvement by focusing on IT customer needs and on the implementation of a process approach towards management. It also enables you to successfully and protectively manage the asset life-cycle, risks and associated costs.

ASSET MANAGEMENT SYSTEMS BASED ON ISO 55001

THE ADVANTAGES OF BEING ISO 55001 CERTIFIED

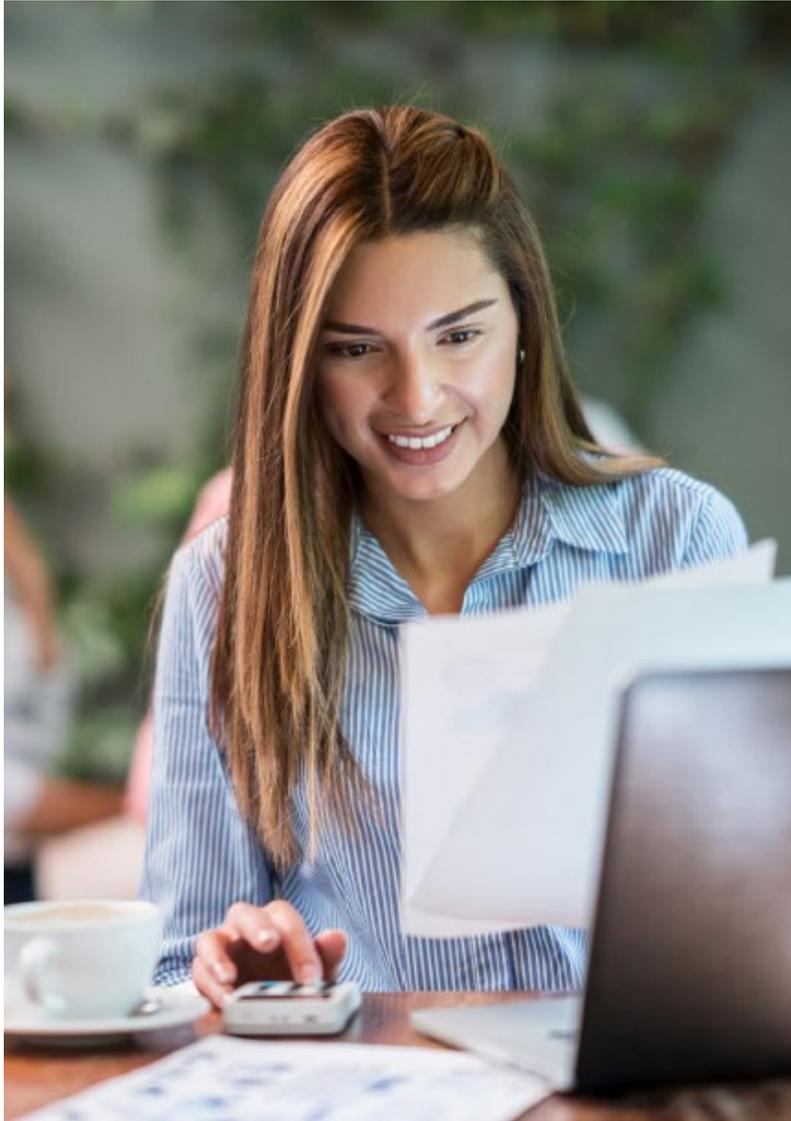

The ISO 55001 certification will prove that you have the expertise to plan, implement, manage and continually improve an Asset Management System. You will have the necessary ability to properly review processes, procedures and asset performance, which lead to the acquisition of constructive feedback regarding the asset status and condition.

It allows you to stand out in the market by having the knowledge and ability to establish an Asset Management System for an organization that realizes the value of its assets and demonstrates social responsibility as well as commitment to different business cultures.

THE BENEFITS YOUR ORGANIZATION GAINS

Asset Management will help your organization enhance its asset life-cycle with a significant increase on asset performance, improvement of return on investment, and reduction of cost without sacrificing the organization's performance.

COURSE	BENEFITS	
ISO 55001 Lead Implementer	Develop your skills and knowledge to support an organization to implement, maintain and improve the AMS based on ISO 55001.	5 Days
ISO 55001 Lead Auditor	Be able to audit an AMS and to manage a team of auditors based on ISO 55001 requirements.	5 Days

OUTSOURCING MANAGER BASED ON ISO 37500

THE ADVANTAGES OF HAVING AN OUTSOURCING CERTIFICATION

Possessing an Outsourcing Certification will help you demonstrate that you have mastered the concepts, approaches, standards, and techniques to support an organization to plan, implement and maintain an effective framework for outsourcing management throughout the procurement lifecycle.

In addition, you will strengthen your personal qualities which are necessary to act with due professional care when conducting an outsourcing project. This is done by identifying the risks involved with outsourcing and understanding how to enter into and continue to sustain successful outsourcing arrangements throughout the contractual period.

THE BENEFITS YOUR ORGANIZATION GAINS

Outsourcing Management is intended to set up a foundation which enables your organization to establish, manage, and continually sustain successful outsourcing arrangements. In addition, your organization will be able to achieve mutual benefits for clients and providers and acquire compulsory skills to advise the organization accordingly when outsourcing.

COURSE	BENEFITS	
Outsourcing Manager	Learn the principles and governance of Outsourcing in order to be able to develop the expertise to successfully sustain outsourcing arrangements and establish an outsourcing strategy that aims to gain mutually beneficial collaborative relationships.	3 Days
Lead Outsourcing Manager	Master the skills and enable yourself to implement, maintain and successfully manage outsourcing arrangements.	5 Days

MASTER CREDENTIALS

Master for Management System Courses (Lead Auditor/Lead Implementer)

Criteria

- PECB Certified Lead Auditor + Lead Implementer Exams or equivalent
- 4 additional Foundation Exams related to the specific industry
- 15 years of experience, 10 of which are related to the specific industry

- 700 hours of experience in auditing + 700 hours of experience in project related to the specific industry

Includes the following Manager Courses

Risk Management Master

PECB Certified ISO 31000 Lead Manager + ISO 27005 Lead Manager Exam

- 4 additional Foundation Exams related to the specific industry
- 5 years of experience, 7 of which are related to Risk Management
- 700 hours of experience in Risk Management + 700 hours in IT Risk Management

Cybersecurity Master

PECB Certified ISO/IEC 27032 Lead Cybersecurity Manager + ISO/IEC 27035 Lead Incident Manager

- 4 additional Foundation Exams related to the specific industry
- 15 years of experience, 7 of which are related to Cybersecurity
- 700 hours of experience in Cybersecurity Management + 700 hours in Cybersecurity Assessment

Project Management Master

PECB Certified ISO 21500 Lead Manager + ISO 21500 Lead Assessor Exam

- 4 additional Foundation Exams related to the specific industry
- 15 years of experience, 7 of which are related to Project Management
- 700 hours of experience in Project Management + 700 hours in Project Assessment
